

your partner in cyber

At cyberSuite, we offer targeted cyber risk advisory and privacy services to help organisations to understand, manage and reduce risks. We believe in holistic cyber security that goes beyond just the technical, incorporating governance, data protection, and information security. Our advisory services are built around this foundational belief, addressing your organisation's risks as the business risks they are and leveraging our expertise to deliver practical advice. We also offer on-the-spot assistance to help you navigate cyber and privacy incidents.

Our team comes from a diverse background, encompassing multiple decades in insurance, security, legal practice, and business leadership. This allows us to provide practical, and business-conscious cyber advisory services.
