

# vCISO trusted advisor

Just as a balanced diet is crucial for personal health, a steady, informed approach to cyber and privacy threats is key to your business's vitality. It's not about quick fixes; it's about evolving your operational mindset to embed cyber security into your business's core. So as a business owner or leader you can create a legacy of success and resilience.

## YOUR CYBER EXPERTS

For many businesses cyber security advice and support can seem out of reach, however, cyberSuite's team of virtual Chief Information Security Officer-like experts, changes this. They are accessible! From assessment to education, these cyber experts translate complex cyber challenges into clear, actionable strategies.

## CUSTOMISED CYBER ADVISORY SERVICES

### Trusted Advisor

Led by virtual Chief Information Security officer (vCISO) experts, this service uncovers cyber risks relevant for your business. Equipping you with actionable insights, resources, and tools to reduce cyber risks.

### Executive Cyber Risk Advice

These cyber security risk briefings provide executive teams with cyber knowledge, equipping and empowering them to make informed cyber risk decisions.

### Organisational Resilience

A robust and practical Business Continuity Plan is the backbone for sustainability. Our experts facilitate and develop resilience strategies that prepare businesses for potential threats and reinforces their capacity to thrive post-incident.
